Portable Wet Gas Calibrator for CEMS

PROFESSIONAL FEATURE

Protech has released our new, improved portable wet gas calibrator for CEMS. The new model is a portable wet gas calibrator that allows for the generation of wet gas to calibrate CEMS wet gas analyzers.

Both the construction and overall flexibility of the new model allow for the calibration of dry gas, but also of the water vapour measurement. Protech is the only manufacturer that offers a portable wet gas calibrator for CEMS. Any other manufacturer's wet gas calibrator will be restricted to either dry gas or water vapour measurement only. Our new model is the only portable wet gas calibrator that can be used for both dry gas and water vapour measurement. Our new model is the only portable wet gas calibrator that can be used for both dry gas and water vapour measurement.

As well as allowing for assessment of the water vapour measurement of the analyser, the new model can be used to assess the cross sensitivity of the other gas analyser to water. The new model can be used to assess either or both of these. Our new model is the only portable wet gas calibrator that can be used for both dry gas and water vapour measurement.

THE BRAND NEW LANDFILL GAS ANALYSER RANGE FROM GAS DATA

THE RANGE THAT MEASURES UP

Reliable landfill gas analysis - available to BUY or HIRE

GM25-4
Our most popular model, the GM25-4, leads the way in accurate and efficient landfill gas monitoring.

GM25-1 **GM25-2** **GM25-3** **GM25 CAT 548c**
